PROFILE

Cybersecurity-focused Computer Science student with a strong grasp of programming and a passion for digital transformation. Adept at building user-centric platforms, especially in e-commerce and healthcare domains, and exploring cybersecurity tools for secure development.

EDUCATION

Sri Krishna College of Technology — Coimbatore, India
B.E. in Computer Science and Engineering — **CGPA: 7.67**
2022 – 2026

Vivekananda Vidyalaya Matric Hr Sec School — Completed Schooling
2008 – 2022

SKILLS

Programming: Java, C++, SQL, HTML, CSS, ReactJS, Spring Boot
Web Development: ReactJS, AWS
Web Technologies: HTML, CSS, JavaScript, REST APIs
Databases: MySQL
Soft Skills: Problem-solving, Critical Thinking, Team Collaboration
Languages: English, Tamil

EXPERIENCE

Octanet Services — Coimbatore, India
Cyber Security Intern — Feb 2024 – Mar 2024

- Conducted **web application testing** using tools like **Burp Suite**.
- Learned secure coding practices and threat mitigation techniques.

Prodigy Infotech — Coimbatore, India
Cyber Security Intern — Mar 2024 – Apr 2024

- Conducted **security assessments and vulnerability analysis** for web applications.
- Utilized **Burp Suite** for penetration testing and exploited common security loopholes.
- Assisted in performing **penetration testing** and reporting on findings.
- Learned industry best practices for **secure coding** and compliance frameworks.

Livewire — Coimbatore, India
Cyber Security Intern — Jun 2024 – Jul 2024

- Performed **system security analysis** to identify and mitigate vulnerabilities.
- Worked with **penetration testing tools** to evaluate security infrastructures.
- Assisted in **network security auditing** and risk assessments.
- Developed reports detailing **security findings and recommendations**.

PROJECTS

Grocery Store Website (Frontend with ReactJS)

- Built a responsive online grocery platform using **ReactJS**, enabling users to browse, search, and order products effortlessly.

- Implemented reusable React components, effective routing, and state management with hooks for dynamic cart functionality.

- Applied **CSS Grid and Flexbox** to create an intuitive UI and mobile-friendly layout.

- Integrated mock REST API to simulate real-time product and user data interactions.

- **GitHub:** GroceryStore

CareSphere – Smart Healthcare Appointment System

- Designed a full-stack web app for booking doctor appointments and managing emergency medical requests.

- Created distinct dashboards for patients and doctors with login/signup authentication using JWT and React Router.

- Integrated features for appointment history, schedule filtering, and emergency request handling via modals.

- Focused on clean UI with form validation, toasts for feedback, and interactive calendar components.

- **GitHub:** CARESPHERE

CERTIFICATIONS

- **Cisco Cyber Security – Professional Certification**, Jul 2024

- **Google Cyber Security – Professional Certification**, Jan 2024

- **Oracle Generative AI Certified Professional**, Jul 2024
